

Q: Which heuristic does this interface adhere to?

- A. Recognition Rather Than Recall
- B. Flexibility and Efficiency of Use
- C. Aesthetic And Minimalist Design
- D. Help User with Errors
- E. Help and Documentation

- Learning Goals
- Human Computer Interaction
 - Usability Heuristics Activity + Review

Course Admin

Course Admin

- **PC Quiz 8** (last PC Quiz! 🎉)
 - Due Sunday, April 6, 11:59pm
- **Project Milestone 3** *(you should be ~70% done by now!)*
 - Due Monday, April 7, 11:59pm
 - Make sure to submit your **AI Disclosure** via qualtrics form!
- **Final Exam**
 - Tuesday, April 22, 7pm; Location: SWING 121

Learning Goals

Learning Goals

After this **today's lecture**, you should be able to:

- Conduct **heuristic evaluations** of given interfaces by identifying which heuristic(s) are satisfied or violated.
- **Break down** complex interfaces into their design components to assess usability using the 10 heuristics.
- **Justify heuristic assessments** by providing evidence and logical reasoning.
- **Recommend specific design improvements** for interfaces based on heuristic violations.

Usability Heuristics

10 Usability Heuristics (Nielsen, 1993)

Visibility of
System Status

1

Match Between
System & Real World

2

User Control
And Freedom

3

Consistency
And Standards

4

Error
Prevention

5

Recognition
Rather Than Recall

6

Flexibility And
Efficiency of Use

7

Aesthetic And
Minimalistic Design

8

Help Users
With Errors

9

Help And
Documentation

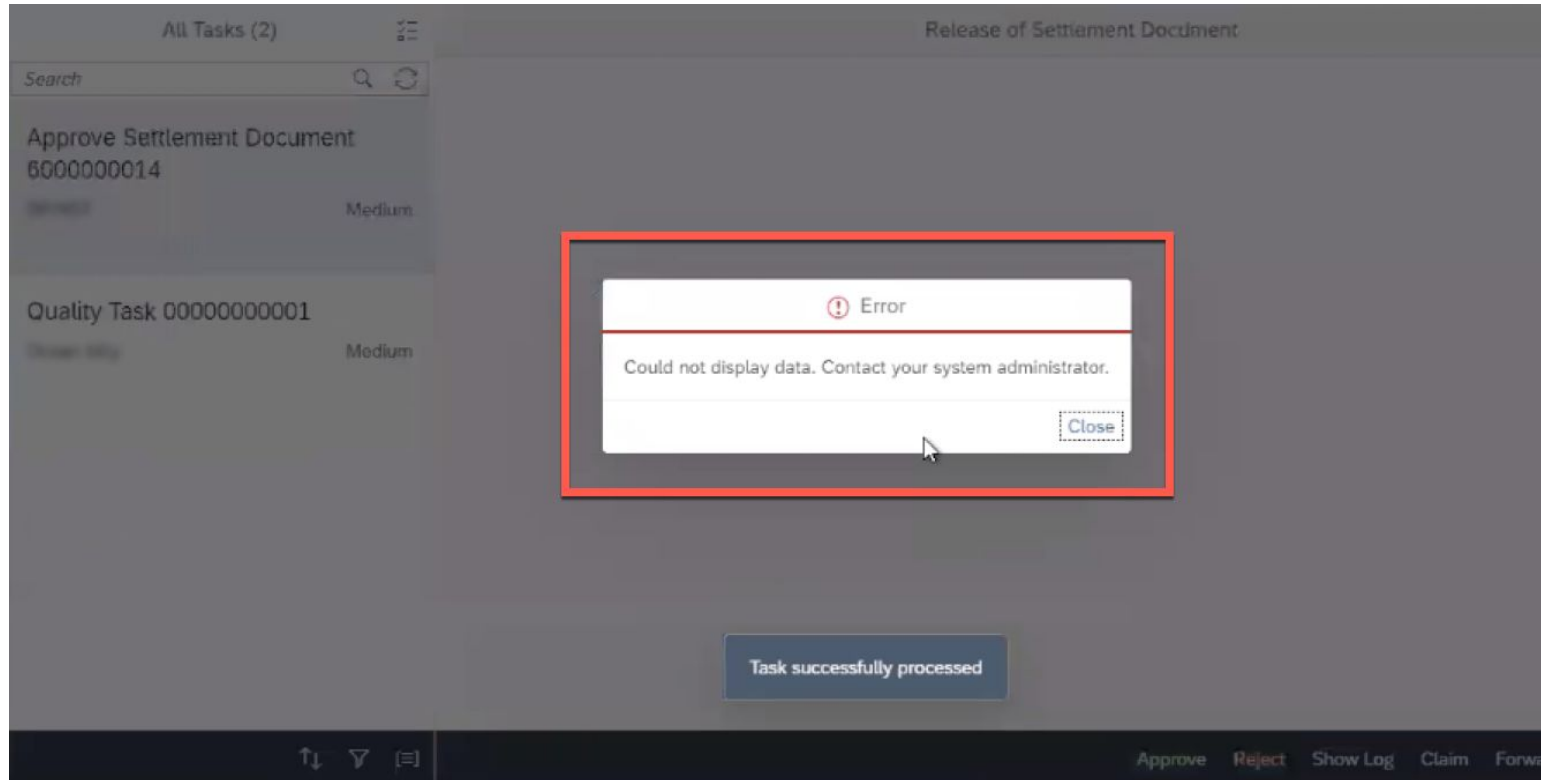

10

What is wrong?

Identify the usability heuristic(s) that are **violated** in the following interface:

Identify the usability heuristic(s) that are **violated** in the following interface:

Identify the usability heuristic(s) that are **violated** in the following interface:

Q: Which heuristic does this interface violate?

- A. Visibility of System Status
- B. Match between System & Real World
- C. User Control and Freedom
- D. Consistency and Standards
- E. Error Prevention

What is good?

Identify the usability heuristic(s) that are **satisfied** in the following interface:

1 ————— 2 ————— 3 ————— 4
