

CPSC 100

Computational Thinking

Logistics

Instructor: Firas Moosvi
Department of Computer Science
University of British Columbia

Agenda

- Course Admin
 - Milestone 5 Final Presentation
 - In-class (**live feedback** to improve before Dec 5)
 - Recorded Presentation (**no** feedback!)
- Another Test !?

Course Admin

Milestone 5 Preview

- Will we present it to the whole class?
 - You're encouraged to, but this is not required!
 - Two options:
 - Option 1: Present in class next week (and get live feedback from me) + submit a digital version (if you want)
 - Option 2: Submit a link to a video recording (Zoom is easiest)
 - You **MUST** sign up as a group, all members should be there together for it to be graded
- Booking slots will open on Friday at 4 PM

Milestone 5 Booking Slots

- All students are still expected to come to class next week !
- Project Milestone 5 presentations will be happening MWF

Sessions		
Session	Date	Duration
☐ Mon Dec 1 - 4:05 PM	2025-12-01 16:05:00 (PST)	10 min
☐ Mon Dec 1 - 4:20 PM	2025-12-01 16:20:00 (PST)	10 min
☐ Mon Dec 1 - 4:35 PM	2025-12-01 16:35:00 (PST)	10 min
☐ Wed Dec 3 - 4:05 PM	2025-12-03 16:00:00 (PST)	10 min
☐ Wed Dec 3 - 4:20 PM	2025-12-03 16:20:00 (PST)	10 min
☐ Wed Dec 3 - 4:35 PM	2025-12-03 16:35:00 (PST)	10 min
☐ Fri Dec 5 - 4:05 PM	2025-12-05 16:35:00 (PST)	10 min
☐ Fri Dec 5 - 4:20 PM	2025-12-05 16:35:00 (PST)	10 min
☐ Fri Dec 5 - 4:35 PM	2025-12-05 16:35:00 (PST)	10 min

Milestone 5 Booking Slots

- **Time to book! Each slot is 10 minutes long**
- In your groups, decide if you will book a slot during class.
- If you book, you are committing to:
 - Having a reasonably close to finished product from all group members
 - Receive feedback from me on your digital artifact
 - Unless there are significant extenuating circumstances (medical emergency), **if you do not show up** for your booked slot, I will apply a **5% penalty** to your overall Project score!

Milestone 5 Booking Slots

- **Instructions:**
 - Choose **one** person in your group to make the booking
 - Everyone else put away your phones and laptops for the next 60 seconds
 - It will be a race

Test 12

- Reminder: Syllabus has 11 Tests
 - We will drop your lowest test and consider your best 10 tests.

Test 12

- Reminder: Syllabus has 11 Tests
 - We will drop your lowest test and consider your best 10 tests.
- **New: Test 12 (Optional)** 🎉
 - One last opportunity to boost your grade before the end of term!
 - If you missed a test earlier in the term or didn't do well on an old test, you can write Test 12
 - No downside (except booking and writing another test)
 - Covered content: everything in the term!

Grading Scheme

Item	Weight	Due date(s)	Category
Learning Logs (10)	7%	Fridays at 6 PM	Homework
Labs (9)	18%	Fridays at 6 PM	Homework
Term Project (5)	25%	TBD	Project
Tests (10)	50%	Weekly	Exam

! Attention

Due dates for Learning Logs, Labs, and the Term project have an automatic 48 hour grace period after the due dates listed above. Any submissions submitted past the grace period will not be graded (unless prior arrangements have been with the instructor before the due date.).

Passing requirements

- Students must satisfy ALL conditions to pass the course:
 1. Pass the Lab component with a grade of at least 50%,
 2. Pass your seven (7) bests Tests (together) with a score of at least 50%,

If a student does not satisfy these requirements, the student may be assigned the **lower** of their earned course grade or 45% in the course.

Learning Goals

Learning Goals

At the highest level, this courses has three main goals.

Students who complete this course will be able to

- explain foundational computing concepts,
- explore applications built on these foundations,
- describe the implications of the applications.

What this course includes

Course Schedule

This is the tentative plan for CPSC 100 this term. This is subject to change.

	Week	Week of	Topic
Algorithms & Programming	1	Sep 1	Introductions
	2	Sep 8	Algorithms and Using AI
	3	Sep 15	Algorithms and Programming
	4	Sep 22	Programming
Data & Internet	5	Sep 29	Data Representation
	6	Oct 6	Internet and HCI
	7	Oct 13	Catch-up Week
AI & Data Mining	8	Oct 20	Artificial Intelligence
	9	Oct 27	Artificial Intelligence
	10	Nov 3	Data Mining
	11	Nov 10	Fall reading break
Data Provenance & Visualization	12	Nov 17	Data Provenance
	13	Nov 24	Data Visualization
	14	Dec 1	Final Projects

DECOMPOSITION

Breaking down problems into smaller, easier parts.

PATTERN RECOGNITION

Using patterns in information to solve problems.

ABSTRACTION

Finding information that is useful and taking away any information that is unhelpful.

MODELLING AND SIMULATION

Trying out different solutions or tracing the path of information to solve problems.

ALGORITHMS

Creating a set of instructions for solving a problem or completing a task.

EVALUATION

Assessing a solution to a problem and using that information again on new problems.

See you
next week!
